DUY NGUYEN

about the author

Master origami artist Duy Nguyen has written over 18 books, including *Uber Origami*, *Zombigami*, and *Origami with Dollar Bills*. He lives in Everett, Washington.

acknowledgments

I'd like to thank my daughter, Natalie Nguyen, for all her help with this book. Natalie has been by my side for the last few years, helping me teach at origami workshops. Her love of origami shows in all the wonderful projects she's worked with me to create. Here's to the Paper Arts Dream Team!

Introduction

This collection combines the best elements of both origami and doll houses. In terms of the latter, the real fun with miniature homes is in the furniture. This is where you can let your imagination run wild, as you consider the infinite configurations possible with an assortment of tables, chairs, lamps and other household furnishings. I have created these elements through the art of origami, and they can be enjoyed by anyone who wishes to re-create these works. It was important for me to utilize similar folding techniques for all of these models so they would have a consistent look. Still, there is lots of opportunity to infuse them with your own personality, by your choice of paper sizes, colors, and even textures. When you are comfortable with the folding sequences, you can even modify the locations of the folds. Many of the steps purposely do not have specific reference points, leaving a chance for you to give your furniture its own personality. Throughout the course of these projects, there are plenty of folds to keep your fingers busy for hours. Enjoy!

paper tips

The best origami paper is very thin, will keep a crease well, and folds flat. You can use plain white paper, colored paper, or wrapping paper. Regular printer paper may be too heavy to make the many tight folds needed. Origami paper is available at craft and hobby shops. Unless otherwise indicated, the paper that is used to make this furniture is 6 x 6 inches. If you are having trouble, it may be easier to start with larger paper.

glue tips

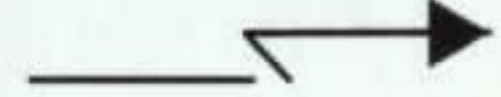

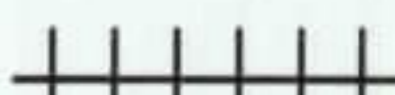

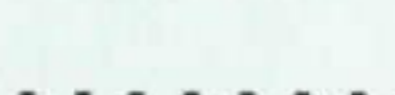

Use an easy-flowing paper glue. Use it sparingly; do not soak the paper. A toothpick makes a good applicator. After finishing a project, use glue as needed to prevent unfolding. Give the glue time to dry. Avoid using glue sticks.

technique tips

Fold with care. Position the paper, especially at corners, precisely. Make sure that edges line up before creasing a fold. Then use a fingernail to make a clean, flat crease. As you make folds, look at the next diagram for guidance. As you become more familiar with the folds, it becomes easier and easier to create origami projects.

CRAFTS & HOBBIES/
Origami

\$14

Fill your doll's house with stylish origami furniture

Origami master Duy Nguyen takes a fun, unique approach to furnishing different rooms in a doll's house, from the living room to the office and the bedroom to the bath. Using the traditional Japanese art form of paper folding, he shows you how to make fantastic miniature furniture and accessories. An introductory section will teach you the basic folds, while illustrated instructions show the folding sequences for the 25 imaginative paper projects, including a sofa, bookcase, computer, divan bed, television, lamp, bathtub, refrigerator, and more.
